Podocalyxin-like precursor (PODXL)

Catalog No. PY-20064

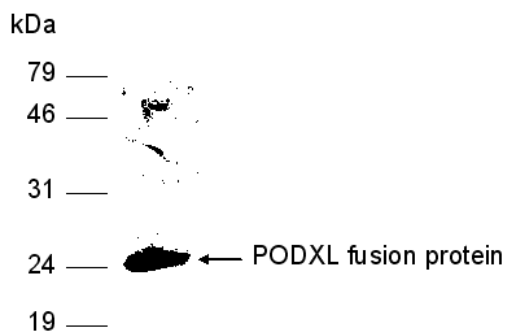

Scale: 1 mg

Form: liquid protein

Target description

Podocalyxin-like protein (PODXL) is a transmembrane sialomucin that is similar in structure to the well-characterized L-selectin ligand CD34. PODXL has been shown previously to be expressed on the foot processes of podocytes in the kidney glomerulus as well as on vascular endothelium at some sites.

SDS PAGE analysis (Commassie blue staining)

Products

E. coli derived PODXL (aa. 335-387) fusion protein

20% SDS PAGE gel

Concentration

1mg/ml

Comments

Protein ID : GI:33598950

Fusion tag : 4kDa (His-tag)

Purity : > 90%

Buffer : PBS

Fusion protein size : 24 kDa

Storage

For long-term storage at -20°C.

Application

Positive control for Western blot

FOR RESEARCH USE ONLY AND NOT INTENDED FOR DIAGNOSTIC OR THERAPEUTIC USE
