# TRI- PEPTIDE

## Copper Tripeptide

### Function:

Inducing production of collagen 3, which allows the skin to be more soft, firm and wound healing.

### Characteristics:

Copper peptides trigger a response, "Activating the Remodeling Process", that actually removes skin damage and replaces it with newer skin.

### Properties:

Repairs the skin barrier, including the fine lines, wrinkles, roughness, sallowness, laxity and brown spots. Prevents allergens and bacteria from entering. Increases water-holding molecules.

### Applications:

Skin healing and care  
Hair and new skin growth  
Anti-inflammatory  
Anti-UV products

### Recommended Dosage:

2 %

*Rebuilding  
skin  
protective  
barrier  
and  
owning  
more  
elastin  
than  
Vitamin C.*
